Satellite Session on Drugs as Reinforcers, Baltimore, MD, June 3, 1978

ISGIDAR sponsored a scientific meeting as a satellite session to the 1978 annual meeting of the Committee on Problems of Drug Dependence. This year we had formal registration with a registration fee of \$5.00. Fifty-one individuals registered and paid the fee for the meeting. In addition, a number of others (members of the Committee on Problems of Drug Dependence and early arrivees to the general session) stopped in for one or more of the papers, consequently the meeting was well attended and lively. Paper presentations were given in the morning and afternoon. The program for the paper session was as follows:

Gerald A. Young, J. Edward Moreton, George, F. Steinfels and Naim Khazan, University of Maryland School of Pharmacy, Baltimore, MD. Self-administration of 1-alpha-acetylmethadol (LAAM) and its N-demethylated metabolites, Nor-LAAM and Di Nor-LAAM, in the dependent rat.

William Woolverton, J. Marshall Newbern and Robert L. Balster, Medical College of Virginia, Richmond, VA Effects of lithium on choice between food versus cocaine in rhesus monkeys.

Marc Risner, Addiction Research Center, Lexington, KY. Self-administration of drugs in the dog.

Alice M. Young, Marilyn Jensen, Laurie Rice and Travis Thompson, University of Minnesota, Minneapolis, MN. Effects of brief stimuli correlated with the availability of food on responding maintained by intravenous codeine.

Steven R. Goldberg and Roger D. Spealman, Harvard Medical School, New England Regional Primate Research Center, Southborough, Mass. Control of extended sequences of drug-seeking behavior by environmental stimuli.

Gary J. Gerber and Roy A. Wise, Concordia University, Montreal, Canada. Medial forebrain bundle lesions selectively attenuate self-administration of amphetamine, cocaine and apomorphine in rats.

Stanley R. Lorens, Loyola University Medical Center, Maywood IL. Are there positively reinforcing effects of drugs with abuse potential mediated by the opiate receptor?

Roy C. Pickens and Phillip M. Catchings, University of Minnesota Medical School, Minneapolis, MN. Metabolic factors in human drug self-administration.

Marilyn E. Carrol, Richard A. Meisch and Charles France, University of Minnesota Medical School, Minneapolis, MN. Effects of food deprivation on etonitazine consumption in rats.

Following the paper session a business meeting was held chaired by President Roland Griffiths.

Election of Officers. The current slate of officers were reelected. They are:

Roland R. Griffiths	President
Tomoji Yanagita	Vice-President
Robert L. Balster	Secretary
David A. Downs	Treasurer

Supplies of Cocaine. The results of ISGIDAR's survey of cocaine needs for research were presented by Robert Balster. These results are being forwarded to the National Institute on Drug Abuse to aid in planning to prevent shortages of this compound for research purposes.

ISGIDAR Bibliography. There was general agreement to continue the ISGIDAR Bibliography. The second edition is included in this newsletter.

The utility of the bibliography rests upon the cooperation of the membership. We want to cover any publications relating to the behavioral pharmacology of drugs of abuse. If you have papers which have not appeared in the bibliography (or for which you have an updated publication status) fill out the form (one publication per form, please) included at the end of the bibliography and send it to the address indicated.

Announcements

The Annual Convention of the American Psychological Association will be held from August 28 - September 1, 1978 in Toronto. Papers of interest to ISGIDAR members will be sponsored by Division 28 (Psychopharmacology). ISGIDAR member Chris Johanson is program chairperson for Division 28 and has put together an excellent meeting. Information on registration, etc. can be obtained in the April-July issues of the American Psychologist. Y'all come!

ISGIDAR will again sponsor a satellite session at the annual meeting of the Committee on Problems of Drug Dependence. This meeting has been scheduled for June 4-6, 1979 in Philadelphia. The ISGIDAR satellite session will likely be held on June 3. A call for papers for the satellite session will be included in the announcement of the CPDD meeting which should be mailed out around October. Plan ahead!

Dr. Inayat Khan of the World Health Organization pointed out the availability of a report of interest to members of ISGIDAR. It is the report of the WHO Expert Committee on Drug Dependence, Technical Report Series 618, 1978. It is based upon a meeting chaired by ISGIDAR member C. R. Schuster held in Geneva in 1977. The report deals primarily with considerations in the international control of drugs and includes extensive discussions of abuse liability assessment. This publication is available from the WHO, Distribution and Sales Service, 1211 Geneva 27, Switzerland, include payment of Sw. fr. 6. In the U.S. send the equivalent in U.S. currency (lately \$2.40) to WHO Publications Center USA, 49 Sheridan Ave., Albany, NY 12210.

ISGIDAR Bibliography
