

Annual Meeting of the International Study Group
Investigating Drugs as Reinforcers with
the Society for the Stimulus Properties of Drugs
Granlibakken Resort
Tahoe City, California
June 15, 1986

8:30 REGISTRATION

9:00 Intranasal cocaine self-administration: Lack of tolerance to pressor effects. R.W. Foltin, M.W. Fischman and J. Pedrosa, The Johns Hopkins University School of Medicine, Baltimore, MD., USA.

9:25 Reinforcing properties of amphetamine in at-risk populations. H. deWit and C.E. Johanson, The University of Chicago, Chicago, IL, USA.

9:50 Effect of cigarette rod length on smoking topography. P.P. Woodson and R.R. Griffiths, Francis Scott Key Medical Center, Baltimore, MD, USA.

10:15 COFFEE BREAK

10:45 Euphoriant response to diazepam predicts response to lorazepam and halazepam but not to alprazolam. J.O. Cole, M. Bird, M. H. Orzack, E. Dessain and Loren Friedman, McLean Hospital, Boston, MA, USA.

11:10 Historical and contextual determinants of the effects of neurotoxin lesions on morphine self-administration. S.I. Dworkin and J.E. Smith, LSU School of Medicine in Shreveport, LA, USA.

11:35 Behavioral disruption due to termination of intravenous cocaine self-administration in rats. M.E. Carroll, S.T. Lac and S. Nygaard, University of Minnesota, Minneapolis, MN, USA.

12:00 LUNCH

1:00 The mouse as a tool in behavioral pharmacology: The establishment and maintenance of oral ethanol self-administration in inbred mice. G.I. Elmer, R.A. Meisch and F.R. George, NIDA Addiction Research Center, Baltimore, MD, USA.

1:25 Intracranial self-administration: The current status. N.E. Goeders, LSU School of Medicine in Shreveport, LA, USA.

1:50 Self-administration of methylenedioxymethamphetamine (MDMA) by rhesus monkeys. P.M. Beardsley, R.L. Balster and L.S. Harris, Medical College of Virginia, Richmond, VA, USA.

2:15 Pharmacological modification of the stimulus properties of psychomotor stimulants. W.L. Woolverton, R.M. Virus and J.B. Kamien, The University of Chicago, Chicago, IL, USA.

2:40 COFFEE BREAK

- 3:15 The discriminative stimulus properties of pentobarbital stereoisomers and other drugs in pigeons trained to discriminate pentobarbital from saline. W.D. Wessinger and G.R. Wenger, University of Arkansas for Medical Sciences, Little Rock, AR, USA.
- 3:40 Three-choice discrimination between d-amphetamine, fenfluramine and saline in pigeons. S.M. Evans and C.E. Johanson, The University of Chicago, Chicago, IL, USA.
- 4:15 Opiate receptor modulation of the pentylenetetrazol stimulus. M.W. Emmett-Oglesby and A. Herz, Max Planck Institute for Psychiatry, Munich, FRG.
- 4:40 BUSINESS MEETING
